

# DAVE LENNOX SIGNATURE® COLLECTION Downflow - Two-Stage Heat - Variable Speed Blower - 60Hz

# RESIDENTIAL PRODUCT SPECIFICATIONS

Bulletin No. 210601 April 2024 Supersedes all previous versions

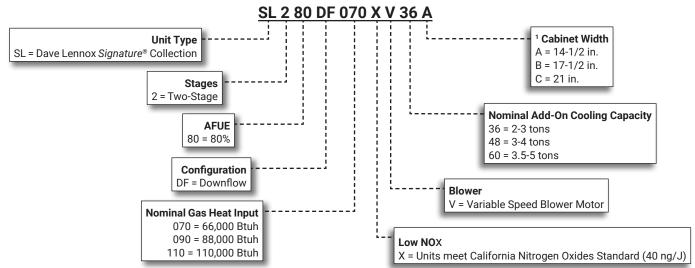

S40 Smart Wi-Fi Communicating Thermostat (Not Furnished)

AFUE - 80% Input - 66,000 to 110,000 Btuh Nominal Add-on Cooling - 2 to 5 Tons

# MODEL NUMBER IDENTIFICATION

Downflow indoor coils with the same letter designation physically matches the furnace supply air opening.

# **FEATURE HIGHLIGHTS**

- 1. SilentComfort™ Technology
- 2. Lennox Duralok™ Heat Exchanger Assembly
- 3. Inshot Burners
- 4. SureLight® Hot Surface Ignitor
- 5. Two-Stage Gas Control Valve
- 6. Two-Speed Combustion Air Inducer
- 7. Flame Roll-Out Switch
- 8. Variable Speed Direct Drive Blower
- 9. SureLight® Integrated Furnace Control
- 10. Insulated Cabinet
- 11. Safety Interlock Switch
- 12. Gas Piping and Electrical Inlets

NOTE - SL280V FURNACES ARE NOT AVAILABLE IN CANADA!

**NOTE - SL280V FURNACES CANNOT BE TWINNED!**

#### APPROVALS AND WARRANTY

### **APPROVALS**

- · AHRI Certified
- Tested and rated according to US DOE test procedures and FTC labeling regulations
- "X" models approved by the California Energy Commission and meets California Nitrogen Oxides Standard (NOx) limits of 40 ng/J
- ISO 9001 Registered Manufacturing Quality System
- Blower data from unit tests conducted in Lennox Laboratory air test chamber

NOTE - This furnace has not been CSA International design certified for installation in mobile homes, recreational vehicles, or outdoors.

#### **California Only**

- These furnaces **do not meet** the South Coast Air Quality Management District (SCAQMD) Rule 1111 and San Joaquin Valley Air Pollution Control District (SJVAPCD) Rule 4905 NOx emission limit (14 ng/J) and cannot be installed within the SCAQMD and SJVAPCD areas
- All "X" model furnaces are approved by the California Energy Commission and meets California Nitrogen Oxides Standard (NOx) limits of 40 ng/J

# WARRANTY

- · Heat Exchanger:
  - Limited twenty years in residential applications
  - · Limited ten years in non-residential applications
- All other covered components:
  - Limited ten years in residential installations
  - Limited one year in non-residential installations

NOTE - Refer to Lennox® Basic Limited Warrenty at www.Lennox.com for additional details.

#### **FEATURES**

#### **APPLICATIONS**

- · Input capacities of 66,000, 88,000 and 110,000 Btuh
- Energy efficiency (AFUE) 80%
- · Compact cabinet
- Lennox add-on indoor coils, high-efficiency air cleaners and humidifiers can easily be added to furnace
- Shipped factory assembled with all controls installed and wired
- Each unit factory test operated to ensure proper operation

# **ZONING APPLICATIONS**

- Can be used with the Lennox® Smart Zoning System with the Lennox® Communicating Thermostat
- Lennox® Smart Zoning System provides direct feedback to the furnace, controlling both airflow and heat output to match the comfort requirements for up to four zones

# **HEATING SYSTEM**

- SilentComfort™ Technology
  - Patent pending burner sound enclosure and extra cabinet insulation reduces operating sound levels
- 2 Lennox Duralok™ Heat Exchanger Assembly
  - Heavy gauge aluminized steel heat exchanger
  - Crimped seam clamshell design
  - Designed for normal expansion and contraction
  - · Minimum resistance to air flow

- Laboratory life cycle tested in excess of industry standards
- Compact size of permits low overall design of furnace cabinet

# 3 Inshot Burners

- Aluminized steel inshot burners provide efficient, troublefree operation
- Burner venturi mixes air and gas in correct proportion for proper combustion
- Burner assembly is removable from the unit as a single component for ease of service

# 4 SureLight® Hot Surface Ignitor

- Tough, reliable, long-life, trouble-free performance
- · Silicon nitride ignitor
- Cemented to steatite block for protection against current leakage
- Ignition leads are constructed of nickel plated copper and are enclosed in high temperature Teflon® insulation for dependable operation

# 5 Two-Stage Gas Control Valve

 24 volt redundant combination two-stage gas control valve combines manual shut off switch (On-Off automatic electric valve (dual) and gas pressure regulation into a compact combination control

# **HEATING SYSTEM (continued)**

- Two-Speed Combustion Air Inducer
  - Heavy duty, permanent split capacitor (PSC) two-speed blower prepurges heat exchanger and safely vents flue products
  - Dual pressure switches (low fire/high fire) prove blower operation before allowing gas valve to open
  - Operates only during heating cycle
- 7 Flame Rollout Switches (2)
  - Factory installed on burner box
  - Switches provide protection from abnormal operating conditions
  - Manual reset

#### **Limit Controls**

- · Primary limit located on vestibule panel
- · Secondary limit located on blower housing
- · Automatic reset

# **Optional Accessories**

# High Altitude Pressure Switch Kit

• Required on most units for proper unit operation at altitudes from 4501 to 10,000 ft.

# Natural Gas to LPG/Propane Conversion Kit

 Required for field changeover from natural gas to LPG/ Propane

# LPG/Propane to Natural Gas Conversion Kit

 Required for field changeover from LPG/Propane to natural gas

# **BLOWER**

# 8 Variable Speed Direct Drive Blower

- Each blower assembly statically and dynamically balanced
- · Blower assembly easily removed for servicing

#### Variable Speed Blower Motor

- Variable speed motor maintains specified air volume from 0 though 0.8 in. w.g. (heating) and 0 through 1.0 in. w.g. (Cooling) static range
- Variable speed operation is achieved by the use of an ECM (Electronically Commutated Motor) motor
- · Motor is controlled by furnace control
- Change in blower speed is easily accomplished by simple DIP switch change on furnace control
- · Motor is resiliently mounted
- · See Blower Data tables

**NOTE** - When furnaces are used with the Lennox® Smart Zoning System and the Lennox® Communicating Thermostat, the blower motor operates from predetermined minimum - maximum air volumes to satisfy zone requirements.

NOTE - When furnaces are used with the Lennox® Smart Zoning System and the Lennox® Communicating Thermostat, the blower motor operates from predetermined minimum - maximum air volumes to satisfy zone requirements.

#### **CONTROLS**

9 SureLight® Integrated Furnace Control (Lennox™ Communicating)

 Advanced control communicates information about various operating parameters in the furnace to the optional Lennox® Communicating Thermostat to constantly maintain the

highest level of comfort and performance available

• Auto Configuration - On start-

up the control automatically sends a description of the unit to the optional Lennox® Communicating Thermostat

to automatically configure the number of stages and features available

- Control also features Innovative AirFlex™ technology allows custom blower settings based on the application
- Thermostat Control For optimal performance, the use of a high-quality, digital two-stage thermostat with adjustable settings for first stage/second stage, on/off differentials and adjustable stage timers is recommended

#### **Furnace Input Staging Options**

| Thermostat Type                        | Input Staging Available |
|--|-------------------------|
| Lennox®<br>Communicating<br>Thermostat |                         |
| Two-Stage<br>(Conventional)            | Two-Stage (65 and 100%) |
| Single-Stage<br>(Conventional)         |                         |

- Safety Controls Flame sensor utilizes flame rectification for safe and reliable operation
- Should flame fail to ignite, control will initiate 4 reattempts at ignition before locking out unit operation for 60 minutes
- Watchguard type circuit automatically resets ignition controls after one hour of continuous thermostat demand after unit lockout, eliminating calls for service
- Display LED Seven segment LED displays alphanumeric information related to diagnostics as well as system operation and status
- Diagnostic codes are held in non-volatile memory, immune from power interruptions
- Stores up to ten diagnostic codes in order of occurrence for recall on demand
- Port on blower door allows for easy viewing

# **CONTROLS** (continued)

#### **DIP Switch Settings**

- · Select Thermostat Used Single-Stage or Two-Stage
- Two selectable second stage recognition times (7 and 12 minutes) are available on the control when the furnace is used with a single-stage thermostat
- When used with a two-stage thermostat, furnace will only initiate second stage operation with a second stage thermostat demand
- Heating Speeds A combination of DIP switch settings allow the following motor speed selection settings within the heating speed selected for fine tuning air volume
  - · Factory default
  - 6%, 12%, 18% or 24% increase
  - 6%, 12% or 18% decrease
  - See Blower Performance tables
- Cooling Speeds A combination of DIP switch settings allow the following motor speed selection settings within the cooling speed selected for fine tuning air volume
  - · Factory default
  - 10% increase
  - 10% decrease
  - · See Blower Performance tables
- Blower Speed Ramping (Cooling Mode) DIP switch settings allow one of four blower speed profiles during cooling operation
  - Profile A (factory setting) Motor runs at 50% for 30 seconds, then at 82% for 7-1/2 minutes, then at 100% (if needed) until demand is satisfied. Once demand is met, motor runs at 50% for 30 seconds, then ramps down to stop
  - Profile B Motor runs at 82% for 7-1/2 minutes and then at 100% (if needed) until demand is satisfied.
     Once demand is met, motor ramps down to stop
  - Profile C Motor runs at 100% until demand is satisfied. Once demand is met, motor runs at 100% for 60 seconds, then ramps down to stop
  - Profile D Motor runs at 100% until demand is satisfied. Once demand is met, motor ramps down to stop
- Dehumidification (Active or Humiditrol® Option) A
  jumper on the control must be clipped to enable active
  dehumidification and/or operation with a Humiditrol®
  Whole-Home Dehumidification System
- · A humidity controlling thermostat or device is also required
- During a call for cooling, air volume is automatically reduced, forcing humidity removal by the air conditioner or heat pump system
- After the humidity has reached the desired set-point the cooling air volume returns to its designed rate. A dehumidification signal from the thermostat reduces the cooling cfm to 70% of the requested cooling cfm
- Dual-Fuel Operation A jumper on the control must be clipped to enable operation with a single or two-stage heat pump. The indoor blower is started without delay when a call for heat is received

- Two-Stage Compressor Operation A jumper on the control must be clipped to enable operation with a twostage compressor
- Lennox System Operations Monitor Connection -Monitors outdoor unit operation (communicating mode)
- Blower On/Off Time (Heating) Blower on time is fixed at 30 seconds, blower off time is adjustable from 60, 90, 120 and 180 seconds (factory setting 90 seconds)
- Blower On/Off Time (Cooling) For air-conditioning applications, blower on time is 2 seconds following thermostat demand for cooling
- See Blower Speed Ramping (Cooling Mode) profiles for various blower off details
- Controls evaporator humidity by controlling blower and compressor speed on two-stage outdoor units when used with the Lennox® Communicating Thermostat
- Continuous Blower Speed Adjustable continuous blower speed is a percentage of the high cooling speed selection
- Four selectable options (via DIP switch settings) of 28%, 38% (default setting), 70% and 100%
- Accessory Terminal One accessory terminal furnished for additional power supply requirements for 120 volt (less than 1 amp) powered air cleaners
- One un-powered pair of contacts are provided for humidifier connections and may be connected to 24V or 120V
- · Control is factory installed in the unit control box

# 24 Volt Transformer (40VA)

- Furnished and factory installed on outside of control box
- · Circuit breaker (furnished) is wired in series

# Field Wiring Make-Up Box

- Furnished for line voltage wiring
- · Factory installed internally on left side of furnace
- Box may be installed internally on right side of furnace

# **CONTROLS** (continued)

# **Optional Accessories**

# S40 Smart Wi-Fi Thermostat (part of the Lennox® Residential Communicating Control System)

 Recognizes and connects to all Lennox® Communicating products to automatically configure and control

the heating/cooling system (based on userspecified settings) for the highest level of comfort, performance and efficiency

- Recognizes model and serial number information for Lennox®
   Communicating products
  - Communicating products to simplify system setup
- Lennox Smart Room Sensors, Lennox Wireless Extenders and Lennox Smart Air Quality Monitor can be added to the system
- Smart home automation compatible with Amazon Alexa<sup>®</sup>, Google Assistant, Control4<sup>®</sup> and Building36<sup>®</sup>
- · Sends service alerts and reminders
- Lennox Smart Thermostat App features Wi-Fi remote temperature monitoring and adjustment through a home wireless network apps for smartphones or tablets
- Lennox Smart Technician App allows installer to manage systems in the home
- Service Dashboard features online real-time monitoring and advanced diagnostics of installed Lennox<sup>®</sup> Communicating systems
- Simple easy-to-use touchscreen allows complete system configuration
- Scheduled maintenance alerts, system warnings and troubleshooting are also displayed on thermostat screen
- Easy to read 7 inch high definition color display (measured diagonally)
- Conventional outdoor units (not Lennox® Communicating) can easily be added and controlled by the S40 Thermostat
- Installer setup screens allow quick and simple system configuration without a manual, Installer can also run tests on complete system or individual components for easy maintenance and troubleshooting
- Serial communications bus (RSBus), with less wiring than a conventional heating/cooling system, allows system communication
- Uses standard 4-wire unshielded thermostat wiring
- High Definition Color Display with Subbase and wallplate furnished for easy installation

**NOTE** - See the Lennox® S40 Thermostat Product Specifications bulletin in the Controls section for more information.

#### Remote Outdoor Temperature Sensor

- · Allows thermostat to display outdoor temperature
- Automatically detected when connected to thermostat

**NOTE** - Sensor is required for the Enhanced Dehumidification Accessory (EDA).

**NOTE** - Sensor is furnished as standard with Lennox® Communicating outdoor units, optional for conventional units.

#### Thermostat

- Thermostat is not furnished with unit
- · Lennox Price Book for selection

# Transformer (75VA)

- Recommended when furnace is used with zoning or defrost thermostats and other 24V accessories requiring a higher VA rating
- · Circuit breaker (furnished) is wired in series
- Replaces the standard 40VA transformer

#### **CABINET**

- · Low-profile, narrow width allows easy installation
- · Heavy-gauge, cold rolled steel construction
- Pre-painted finish
- Flanges provided on supply air opening for ease of plenum connection or alignment with indoor coil
- oxdots Insulated with foil faced insulation on sides and back of heating compartment and mat faced insulation in blower compartment
  - Sealed blower compartment
  - Inner blower compartment access panel seals blower compartment from air leakage
  - Cabinet door can be removed without any tools
  - Complete service access
- Safety interlock switch automatically shuts off power to unit when inner blower compartment access panel is removed
- Gas piping and electrical inlets are provided in both sides of cabinet

### Coil Match-Up

 All Lennox downflow indoor coils will physically match the furnace supply air opening with the same letter designation (A, B, C, D) as in the furnace model number

#### Low Leakage Cabinet

- All models have less than 2% air leakage
- Meets ANSI/ASHRAE Standard 193-2010 "Method" of Test for Determining the Air Tightness of HVAC Equipment"

#### **Optional Accessories**

# Downflow Combustible Flooring Base

- Required for heating only units installed on combustible flooring
- Not required in add-on cooling applications
- See Dimension drawing

# FILTER (not furnished)

· Filter and provisions for external mounting must be field provided

# **Optional Accessories**

#### **Downflow Filter Cabinet**

- Filter cabinet mounts directly on top of furnace
- "A" width cabinet includes one filter
- "B" and "C" width cabinets include two filters
- Filter rails are furnished
- Front access for servicing
- Cleanable filter(s) are furnished

<sup>&</sup>lt;sup>1</sup> Remote Outdoor Air Temperature Sensor is used with conventional (non-Lennox® Communicating) outdoor units (sensor is furnished with Lennox® Communicating outdoor units). Allows the thermostat to display outdoor temperature. Required in dual-fuel and EDA applications.

Annual Fuel Utilization Efficiency based on DOE test procedures and according to FTC labeling regulations. Isolated combustion system rating for non-weatherized furnaces.

<sup>&</sup>lt;sup>2</sup> Optional for service diagnostics.

<sup>&</sup>lt;sup>3</sup> Cleanable polyurethane, frame-type filter.

# HIGH ALTITUDE DERATE

NOTE - Units may be installed at altitudes up to 4500 ft. above sea level without any modifications.

At altitudes above 4500 ft. units must be derated to match information in the shaded area shown below.

NOTE - This is the only permissible derate for these units.

<sup>&</sup>lt;sup>1</sup> Cooling and heating speeds are based on a combination of DIP switch settings on the furnace control. Refer to Installation Instructions for specific DIP Switch Settings. <sup>2</sup> Factory default setting.

 $\ensuremath{\mathsf{NOTES}}$  - The effect of static pressure is included in air volumes shown.

First stage HEAT is approximately 91% of the same second stage HEAT.

First stage COOL (two-stage air conditioning units only) is approximately 70% of the same second stage COOL speed position. Continuous Fan Only speed is selectable at 28% and 38% of the selected second stage cooling speed - minimum 250 cfm.

Lennox® Smart Zoning System Applications - Minimum blower speed is 250 cfm.

<sup>&</sup>lt;sup>1</sup> Cooling and heating speeds are based on a combination of DIP switch settings on the furnace control. Refer to Installation Instructions for specific DIP Switch Settings.
<sup>2</sup> Factory default setting.

NOTES - The effect of static pressure is included in air volumes shown.

First stage HEAT is approximately 91% of the same second stage HEAT.

First stage COOL (two-stage air conditioning units only) is approximately 70% of the same second stage COOL speed position. Continuous Fan Only speed is selectable at 28% and 38% of the selected second stage cooling speed - minimum 450 cfm.

Lennox® Smart Zoning System Applications - Minimum blower speed is 450 cfm.
